

K9-DIESEL

RUGGED, DURABLE AND RELIABLE

Each TraumaFX® product is designed from the ground up for ruggedness and durability with careful consideration of materials and manufacturing processes to create products that last. They are water resistant and can be used in nearly any weather condition or environment, and can be transported in any vehicle to ensure the most authentic training experience.

REMOTE CONTROLLED WITH REAL-TIME SENSOR DATA

All TraumaFX® high-fidelity simulators are operated with a long-range touchscreen remote controller which includes real-time telemetry to monitor medical interventions. Easy to use software takes only minutes to learn and sensor data is immediately displayed on the main control screen for quick reference. The display shows key vitals and provides instructors with instant data on the effectiveness of student interventions such as tourniquet application, wound hemostasis, airway intervention, needle decompression, and chest tube placement.

TRAUMAFX® MULTIPLE AMPUTATION TRAUMA TRAINER (MATT)® AWARDS

REMOTE CONTROL & SENSOR FEATURES

The wireless handheld remote control includes programmable scenarios for ease of operations. It provides full system operation from up to 200 yards away and includes real-time telemetry for sensor feedback and vitals data.

Handheld remote control

• Respiration rate

Pulse rate

- Pulse strength
- Wound hemostasis
- Tension pneumothorax
- GDV setting

TACMED SIMULATION

K9-DIESEL

The TraumaFX® Advanced Canine Medical Trainer (K9 Diesel) is a full-body simulator for Operational Canine First Responders, Military Working Dog (MWD) handlers, Veterinarians, and Veterinary Technicians. Designed in partnership with the Department of Defense (DoD), **K9 Diesel** is a state of the art skills trainer that includes active breathing, audio queues and over 28 different features and medical intervention sites. All training sites are designed to replicate the look, feel, and function of actual medical procedures. Interchangeable limbs and injuries provide greater flexibility to vary wound patterns. K9 Diesel is the most advanced K9 simulator available and allows learners to perform a wide range of critical lifesaving tasks with an incredibly realistic experience.

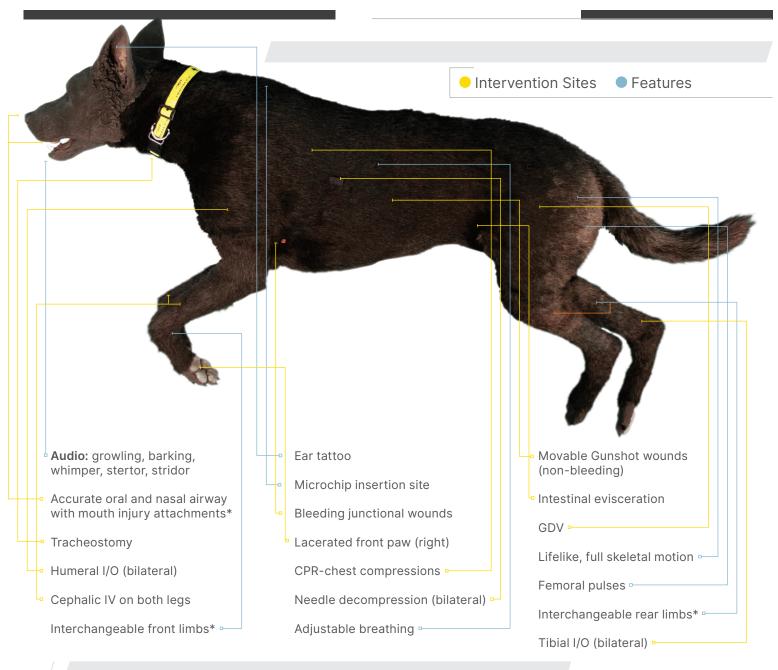

breathing - from slow (10 bpm) to Reusable lacerated paw for suture and bandage training

(50-170 bpm)

- Gastric Dilatation Volvulus decompression (GDV) site (bloat)
- CPR chest compressions with resistance
- Mouth-to-snout resuscitation
- Infusible (bilateral) Tibial and Humeral intraosseous (I/O) training with reusable bone plugs
- Intestinal evisceration
- Packable bleeding junctional wounds (bilateral)
- Moveable, simulated GSWs for chest seal training

- Tracheostomy training site with multilayered tissue
- Realistic look and feel with a weight of ~60 lbs
- Hydrophobic fur with washable leg socks
- Easy care and maintenance
- Optional limbs/accessories include lower amputation on front leg (left), resettable compound fracture rear leg (right), mouth wound kit with injured mouth and tongue with throat blockage, floppy ears
- Wireless remote control with realtime sensor data and programmable/ customizable scenarios

FEATURES GUIDE

OPTIONAL FEATURES

Wireless handheld remote (RC) with programmable scenarios

* Optional limbs and wound kits sold separately.

Audio queues including barking,

KEY BENEFITS

panting (120 bpm)

placed in esophagus)

Lifelike, full anatomical skeletal motion

Realistic airway with adjustable

Intubation with chest rise and fall

(stomach rise and fall if incorrectly

Interchangeable front and rear limbs:

includes front legs with adjustable

carpal fractures, two uninjured rear

legs, and an amputated left rear leg

whimpering, growling, stertor, and stridor

with pressure-responsive bleeding

Needle decompression/thoracocentesis with air release (bilateral)
